FRIC JONES

BODMIN 1997

Sienday 8th June I drove book to hadon from the Lake Distail yesterday after having spent a glavious week colking the fells The down to Combolle Gday was very ting and I don't think I am firing on all eylinders yet. As a result ! and aid my wallet with all my remeny and credit cards, whilst / " westeroorgale (?). I finally found offis Creatorer Kuhe and Itelen lovet couldn't grend much truce with then as I was concerned about my wallet. I returned be the car (taking knice as long to get boch) and found I'd placed the wallet in a side poster. Nihe had given me the tray to the caravan so Il west directly to the Carmon Sike where this to being written ck 5.30 pm

and after the ruggedness of the hoheland Jells the Badwin Hilly seem com threatening. The Hul circles Cook interesting loute it is the appointing that the occupation Cevels (wholeve they are) have not yielded more Charle or young to take are through the last two weeks weath on his Stone circle to traviorrew he is Covering and I am taking over the Signer voice of his excavoluou. I hope I stall have more luck. The Con Coul weeking of your wine days I have had plenty of the to reflect on the statement that Archaeology is colonel interpretation car it is halling". I record the word I had whe I first found a Stouch well be post was more importent to me than any interpretation.

Archaeology is to my muid, a way of sersing the post- through descovery of literal the discovery and recording of wents here can be no interpretation dem stape (as Euro, autille) It will be interesting to see of Istile bold do view in three weeks time. I spent the night on the floor of Henry carava are had withe sleep. As a result I felt pretty rough this morning and the anxiety I fell about taking the geep up to the site dichit help. well couldn't have chosen a crosse morning as the nist make novigation difficult. we eventually made it to the the top with only one major scrape of the underbody o me geop. 1) The so-called (can stones Mak seen

to be in most of the structurer may have been used as the back stone because they prevaled loose rocks from sliding further down the slope and therefore were stone free dawn slope (are therefore suitable for but erection) 2) There are no post holes in the huts but do posts need holes? There are sufficient rocks to whe a fine foundation one the posts care early have been packed around the Gove by rulde. " Certainly well orthostold in some of the held are supported by other stones and have not been set into pite in the ground. The journey back in the greep was I no easier even thought the mist had tyted and I am not Cooking forward to another trip,

Tuesday 10" fine The weather was pretty load all day but so bad dis ofternoon What we had to leave me site early. Had Ele dem Conce The deprese to ina give bedremich and the surbunding him and differently chan they are today of Presently during the Bronze Age the true time would have been a neaver source got house posts than currently de Drs. However as there are no part holes perhaso posts were not used. The following are (wo pessibilities Central sividing Havespread raping sign stone Hal have taken robbed leaving

Cary and Helen slowed me a Cist and Cany demanstrated that it could have sypported an inhundran (surial rather than a columbia which I foroused. And then down care the rain and we calined travelling one I continued raining, we so we left. Wednesday 10 m gine I find that I quete enjoy the walk in one morning land evening land evening land and and of day one as 11 contexts I find that ofter having I am veade to bed. Cut it only arrived et 5 30 m

by which time we were finished for The Alle of first globally It so sound on Thresday 12" June Coasian in the canter and whaten has I have only ween less for a few days il seem much lenger. The completity The Creach wokes yor hard with and to date. Perhaps it weens be better if the weather improved, we haven't seen the sun hardly of all and drying out wet clock is tire some rule and Justin and ho diner and to amble so to my own theights. I cook say that I am sorry for 1 don't seem to have had any time to myself since I get here and I am still exhausted Legernian become 'acquirelline and Justin Jound - potsherd in the (rech Godon but it has coused

problems for its opplans to be of Iron Age dake de pirot glace This provided décussion between myself Mike ad sue on the relevance of its Cocation in the context and whether has holy a how the position was no Illare much larger. The conserve I'm the Court mokes you had wish an I can only hope that things will improve next week margin de marche de de de de la finale It is splenday night and another day is parte weather was beautil work us frustrating and persond cateraction was a little strained The problem with running three wenches do ene time where there aver's three sels of hods is that Supervisors become acquisiture and

tand to hoard. This creates problems

there are at recessory

nihe is to be congratulated for his coffee pot and this fresh coffee às alevers a welcome piel me up (in spite of his violent mood wings) Sunday 15 h June Another warm day en Leskernich. I here stopped going to tea breaks because of the wolf smarloge and enjoy the time dene in the trinch. The only problem is being interrupted by victors. Today / entertained a group with three dogs, two of hom desille to fight each ether. It was more excitely than my thence geo-morphologists have just spent two day with us. Manday 16th June Complexity of sile berget of Excavation Available Resources

there seem to be deferrent ways of interpretary this equation but one thing so obvious and mat is that complex site can aly be excavated in short periods of time of resources are plentique.

We importunately do not have the turing of members of diggers and a me dependence level of the team is relatively loss progress is recessority slaw.

here are only seven more digging days left and I can't see us completing my trench, at least not as fully on we would have wished. I Exist that we should have concentrated on two transhes this year rather than there.

I wo Minking today that heskerneth Will is the a large Bronze Age wounds. Perhaps it's setting in the Landscape and the fact that it

drew . B.A. people to it in the first places is did I deal was how. since I have been here; portraity des thenday 65 1 June A condition of bad weather, I'm persona space has changed the and bience of the dig. This is to be expected an oney excovation and having to load view sociologists and anthropologists has placed an extra burden on the proceedings. Today is a day of because of the beam, il seens tot everyone is is need ? with we shill looks the sole of beskernich tokes no prisoners are the on all who work in it amesance Colea de va firs Still tomorrow the sur will sline, The

carto will soon and herhemich will ence more become hospiloble. I that I must have Cost 1016 in weight since I have Gear here; portabily due to my cooking I must admit.

Solvers and Sell Good. Coule this did not deter the many visiters to the sile. Henry shillfully possed the baton on Go the superisons to proute the interpretation of the Greaker.

The fact that we were able to clear the Work-West quadrate and pludegraph it is the the rain free periods seemed to light spirity but we still left the site of 5.00pm.

Alleng wayne's test was a topic of anusement when it was first directed it proved its work To wanted to Cohe some photographs
of the horses (out on the very day
by had my camera I distate see the

Monday 23 ml June

The weather has finally improved and

spirits are somewhat improved. We
now have various interpretations for

the construction of the walls of the hut

there was obviously a lot of work

at thought put into the lavilling of

the hut but the reason for size of the

world's is unknown. What is reason juve.

Had the evidence for domestic

occupation is non existent perhaps the

huts were used for other purposes.

all forth of action theres.

i shalled the help were for a moine

God weather ogen and we are all looking forward to the end of the dig. 5.66. seems to be pleased with the amount of work achieved (out / feel desappointed.

The took me are week to cong to understand the called and istery-relation of C.G., another week to understand the soil development and how I sow the structure wisher at and on some or I felt carbident of toking on the treat the weather and changed and we were not ober to do too much.

Strice, heskerniet es a place with never forget ad under kniell caditions could allow the imagidue all sorts of adventures,

whether the huls were for occupation

Seasond occupation of intual use we have no idea (ut juie the lock of Cast posselling Thursday 75th June The dig is obacet over and I have had relatively lettle contact with the anthropologists. It was seens hat there never was any intention to complete the excavation of the two oplant quadrants as excavation will continue for another two seasons. If I had know this of the beginning I would have concentrated my efforts on the N.W. quadrant and perhaps We would have been dole to properly excavale the wall. As It stands we shall have to leave heskernich will neither quadral being completed what is more I only one quadrant had been opened It would have been easier to backfill and would have allared more people to participate in the survey of de him

hooken boch over the post- three weeks I feel not with hos hoppened to woke me change he way I view Hot is that consersus management does not work and too many cooks tend to turn the took sour, especially to Cordon Blew Status ander a salage is. The ran years had there never with come in the will an to complete francisco established in the second of the s is it is a few of the contracte for no they The seasons. If I had former this the the peperage I would have conceleded in effects on the M.W. quadral are perhaps We would have been don to properly execute the walk, is it youls in hall mine to ever histories was raiked quadral bring completed, cotal is now of and as quadert had been spende courte have good so sier to backfill and would have allased more people to participate in sin superior of de his
